

## Message from Registrar – NIT Srinagar, India

**Prof. S. K. Bukhari**

I feel honored and privileged to pen down my message as Registrar of National Institute of Technology Srinagar. Organizing international events with prestigious institutions of the country has always been a pride for the whole fraternity of NIT Srinagar. Notwithstanding the continuing adverse conditions prevalent in the valley, NIT Srinagar has been relentlessly continued its journey for achieving excellence over the decades.

The increasing multidimensional importance of nanotechnologies and the immense benefits that can be derived from its use for development cannot be over emphasized. Nanotechnologies are regarded and acknowledged as a triumph of human ingenuity in modern times and this emerging field is leading to a technological revolution in the world. It is the next industrial revolution and almost all industries will be radically transformed soon and would directly benefit a common man when it comes to commercial use.

More than 300 researchers and scientists from 22 states and 10 countries with research interests in diverse areas will share knowledge and enhance scientific collaborations. The organizers of the conference particularly Dr. M. A. Shah deserves accolades for making this scientific event happen in collaboration with the prestigious institution- IIT Kharagpur of the country and in association of many organizations.
